

Lab 5 MASTER PAGE

1. Create a Master Page and named it as **myMain.Master**.
2. Add > Existing Items > **bg.jpg**, **bg2.jpg**, and **layoutStyling.css**.
3. Link the stylesheet to **myMain.Master** and set the background of the master page as shown in Figure 2.

```
<html>
<head runat="server">
  <title></title> <link href="layoutStyling.css" rel="stylesheet" type="text/css">
  <asp:ContentPlaceholder ID="head" runat="server">
  </asp:ContentPlaceholder>
</head>
<body style="background-image: url('bg.jpg');">
```

Figure 2: First Master Page and CSS

4. Add the following HTML tag to **Source** for navigation menu as shown in Figure 3.

```
<body style="background-image: url('bg.jpg');">
  <div id="wrapper"></div>
  <form id="form1" runat="server">
<div id="menu" class="row" margin-left="0px">
  <div class="navbar">
    <a href="home.aspx">Home</a>
    <a href="about.aspx">About Us</a>
    <a href="regForm.aspx">Subscription</a>
    <div class="dropdown">
      <a href="page1.aspx">Content </a>

      <div class="dropdown-content">
        <a href="page1.aspx">Page 1</a>
        <a href="#">Page 2</a>
        <a href="#">Page 3</a>
      </div>
    </div>
  </div>
</div>
```

Figure 3: Navigation menu

5. Create two pages: Home (home.aspx) and About Us (about.aspx) by applying **myMain.Master** as shown in Figure 4.

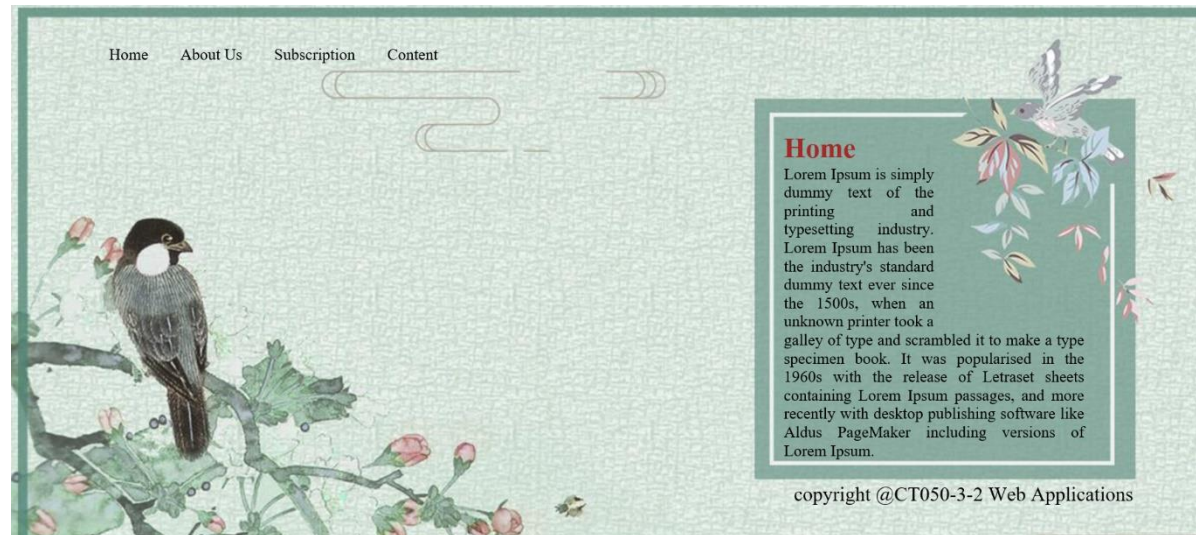

Figure 4: Home page

6. **Save > Build Solution > Run home.aspx** to view it in browser.

7. Create another Master Page and named it as **myMainForm.Master**.
8. Link the stylesheet to **myMainForm.Master** and set the background of the master page as shown in Figure 5.

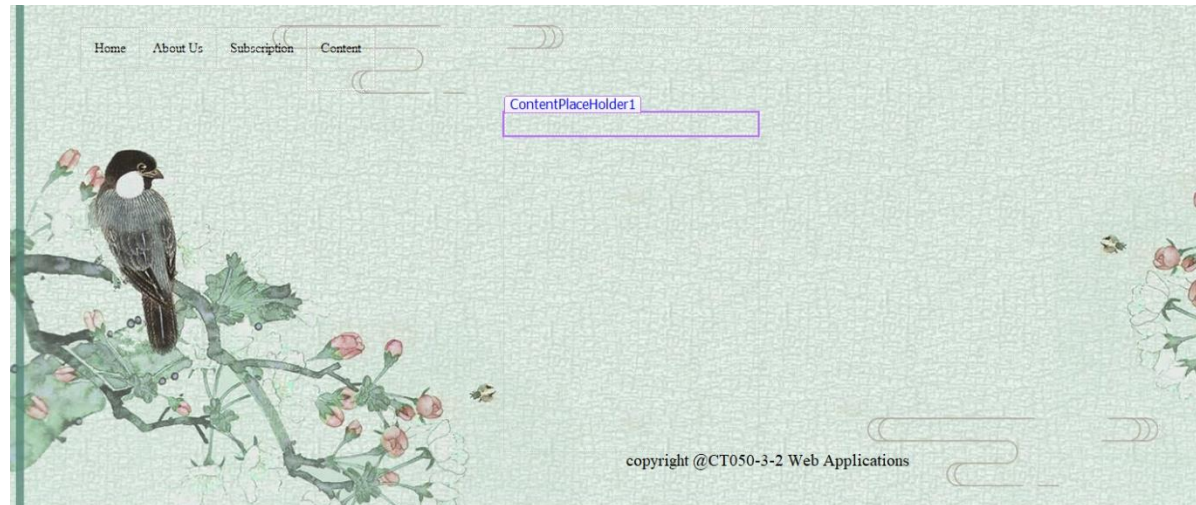

Figure 5: Second Master Page and CSS

9. Create one web form for Registration (regForm.aspx) and apply the **myMainForm.Master** as shown in Figure 6.
